

Technical Data Sheet

Alum. Stearate

Product Description

Alum. Stearate is used to prevent foaming in water-based muds.

Applications: Defoamer in water-based muds.

Treatments: Alum. Stearate can be applied over problem areas within the mud pits where foaming is evident. In addition, Alum. Stearate can be blended with diesel or a mineral based oil at a rate of 5 - 10 lbs per 5 gallons of oil.

KEY BENEFITS

- **Effective defoamer at low concentrations**
- **Has minimal effect on rheology in water-based muds.**

Key Properties

Color	White
Physical Form	Powder
Sg	1.01
Solubility	In soluble in water
Packaging	25 lb Sacks
