

Technical Data Sheet

BX

Product Description

BX is an anionic polymer with the capability to double the yield of Gel. BX is able to maintain a given viscosity with half the amount of conventional clay solids. BX is an excellent additive for low-solids drilling fluids.

Applications: increases yield of Gel by extending

Treatments: Typical treatments range from 1 - 2lb bag of BX for 4 - 8 100lb sacks of Gel

KEY BENEFITS

- Increasing yield of Gel
- Helps reduce fluid loss control
- Filter cake quality through mini-mized solids volume

Key Properties

pH	5.0 - 9.0
Color	White
Physical Form	Powder
Sg	2.6
Packaging	2 lb bag
