

Technical Data Sheet

Bentone 990

Product Description

Bentone 990 organophilic amino-attapulgite is a rheological additive for oil-base muds. **Bentone 990** unique rheological structure suspends solids and weight material with less increase in viscosity and gel strengths than conventional organoclays.

Applications: increasing carrying capacity; suspension of weight material, and controls settling with out the use of other additives

Treatments: Typical concentrations range from 1 to 5 lb/bbl.

Daily maintenance treatment are required. Pilot testing is suggested to determine the actual treatment required to obtain the desired properties.

KEY BENEFITS

- Increase carrying capacity
- Suspension of weight material
- Controls settling with minimal viscosity and gel strength increases

Key Properties

Color	Light tan
Physical Form	Powder
Sg	2.0
Packaging	50 lb Sacks
