

Technical Data Sheet

Cedar Fiber

Product Description

Cedar Fiber is shredded cedar wood used to prevent and/or regain lost circulation. Cedar Fiber is an effective material for regaining circulation when major loss zones are anticipated. Cedar Fiber should be used with various sizes of granular and flake material to produce a wide variation in particle size

Applications: Cedar Fiber is compatible with all types of water, synthetic and oil based muds. It can be used in sweeps or pills or added to the entire system which will require pulling shaker screens.

Treatments: suggested treatments for minor losses are 2 - 10 lb/bb and 5 - 25 lb/bbl for losses requiring higher concentrations. Cedar Fiber should be used with various sizes of granular and flake material to produce a wide variation in particle size

KEY BENEFITS

- Can be used in high fluid loss slurries or squeezes.
- Effective over a large range of concentrations.

Key Properties

Color	Brown
Physical Form	Fiber
Sg	0.60
Packaging	40 lb Sacks
