

Technical Data Sheet

Clean Seal

Product Description

Clean Seal is a blend of acid soluble particles and plugging agents specifically engineered to bridge and seal permeable formations. Clean Seal has been engineered for partial to severe lost circulation in pay zones.

Applications: Clean Seal is effective for use in water, oil and synthetic based systems. It can be used in sweeps or pills or added to the entire system.

Treatments: suggested treatments for minor losses are 2 - 10 lb/bbl . For more severe lost circulation 5 - 40 lb/bbls.

KEY BENEFITS

- Does not affect the rheological properties.
- 97% acid soluble.
- Provides a wide particle size distribution.

Key Properties

Color	White to Gray
Physical Form	Powder
pH	7.0 - 9.0
Packaging	40 lb Sack
