

Technical Data Sheet

IN FORCE OWC

Product Description

IN FORCE OWC is a highly concentrated oil wetting agent for invert emulsion fluids that improves the wettability of solids.

Applications: Control of the wettability of solids; and prevent water wet solids.

Treatments: Typical concentrations range from 0.5 to 1 lb/bbl depending on the oil/water ratio, and type of oil. Treatment for thinning slugs 2 - 5 gallons per 50 bbl.

Pilot testing is suggested to determine the actual treatment required to obtain the desired properties.

KEY BENEFITS

- Oil wetting of solids
- Rheological stability.
- Help thin barite slugs before pumping

Key Properties

Color	Dark/Green
Physical Form	Liquid
Sg	0.87
Flash point	175°F
Packaging	Drum
