

Technical Data Sheet

LCF 1/2

Product Description

LCF 1/2 is an engineered, proprietary lost circulation product composed of natural fibers that provide a wide particle size distribution.

Applications: **LCF 1/2** is utilized to provide cures for lost circulation and can be added in pills or to the entire system. It also performs well in combination with other LCM additives.

Treatments: Typical treatments are based on the severity of the loss circulation. It can be used in concentrations of 5 - 40 lb/bbl.

KEY BENEFITS

- Particle size optimum for all types of lost circulation, including seepage and more sever losses.
- Compatible with all types of water, synthetic and oil based muds.

Key Properties

Color	Tan to Dark Brown
Physical Form	Cellulose Fiber
Sg	1.2
Bulk Density	18 - 24 lbs/ft ³
Packaging	25 lb Sacks
