

Technical Data Sheet

Sulf Asphalt

Product Description

Sulf Asphalt is a water soluble additive that aids in stabilizing shale sections, and improves wall cake characteristics. It also aids in API fluid loss control and HTHP fluid loss.

Applications: Shale stabilizer, aids in reduction and control API and HTHP fluid loss.

Treatments: Typical treatments range from 3 - 5 lb/bbl for shale stabilization. Treatments 6-10 lb/bbl for HTHP fluid loss control.

Pilot testing is suggested to determine the actual treatment required to obtain the desired properties.

KEY BENEFITS

- Shale stabilization/inhibition
- Helps reduce and control fluid loss
- Improves well bore stability
- Lowers torque and drag

Key Properties

Color	Black/Brown
Physical Form	Powder
Sg	1.7 - 1.9
Packaging	50 lb Sacks
