

Technical Data Sheet

BIO FORCE

Product Description

BIO FORCE is a specialty additive used in drilling fluid applications to control levels of commonly encountered microorganisms present in fluids used during drilling operation.

Applications: Can be applied continuously or batch treated.

Treatments: treatment rates depend on the severity of the bacteria problem, the treating method, and the economics of treating a specific system.

Typical starting treatments for drilling or storing mud is 5 gallons per 100 bbl. Of whole mud.

For continued or exact treatments, bacteria testing the base fluid and whole mud will be needed.

KEY BENEFITS

- **Is fast and effective control for bacteria growth and fouling.**
- **Is safe to handle: non-corrosive, and noncarcinogenic.**
- **Does not contain formaldehyde**

Key Properties

pH	6.0 - 9.5
Color	Colorless - slightly yellow
Physical Form	Liquid
Sg	1.025
Packaging	5 gal pails, 275 gal totes
