

Technical Data Sheet

Soap Sticks

Product Description

Soap Sticks are solids soap sticks designed to lower the hydrostatic head in shallow, low pressure gas wells. They are also useful during the top-hole drilling to prevent bit-balling and mud rings. They are designed to melt or dissolve quickly in hard or soft water at low temperatures.

Applications: **Soap Sticks** should be dropped down the drill pipe on connections.

Treatments: 2 to 6 **Soap Sticks** per connection with good drilling practices will keep most shallow clays from balling the bit.

KEY BENEFITS

- Reduce Bit Balling
- Easy to apply
- Designed to quickly dissolve

Key Properties

Color	Pink / Yellow
Physical Form	Solid stick
Sg	1.07
Melting Point	120°F
Packaging	Ice Chests
