

Technical Data Sheet

PRIMO SEAL GP

Product Description

PRIMO SEAL GP, lost circulation product is a patented seepage and lost circulation product designed to minimize the adverse effect on electrical stability and rheology of oil and synthetic base invert emulsion muds.

PRIMO SEAL GP is naturally saturated (8%) with high molecular weight fatty oil which reduces the tendency of the fiber to water wet. **PROM SEAL GP** will also function as a seepage and loss circulation material in water base muds.

Applications: **PRIMO SEAL GP** is effective for use in water, oil and synthetic based systems. It can be used in sweeps or pills or added to the entire system.

Treatments: typical treatments are 2 to 10 lb/bbl for seepage and 10 to 35 lb/bbl for partial losses

Grade	% Less than 300 μ
Fine	98%
Medium	50%
Coarse	25%

KEY BENEFITS

- Provides a wide particle size distribution.
- Compatible with water, oil, and synthetic based systems.
- Easily mixed and dispersed into mud systems
- One sack product with no other additive requirements
- Fine grade easily passes through most shaker screens

Key Properties

Color	Brownish Red
Physical Form	Powder
Packaging	25 lb. Sack
