

Technical Data Sheet

JET HIB 5000

Product Description

JET HIB 5000 is an organic polymeric amine/triazine blend that reacts with and removes hydrogen sulfide from industrial and oilfield waters. It contains no heavy metals.

JET HIB 5000 removes hydrogen sulfide by reacting with the sulfide ions and forming sulfur-amino reaction product with low toxicity.

Applications: **JET HIB 5000** is recommended for use in industrial, non-potable waters where hydrogen sulfide is present from sulfide-bearing formulations, bacterial action, or chemical waster water.

Treatments: Recommended dosage depends on the amount of hydrogen sulfide present in the water.

KEY BENEFITS

- **Helps remove hazard of dangerous H₂S gas escaping to the surface**
-

Key Properties

Solubility, Water	Soluble
Solubility, Oil	Insoluble
Color	Dark Red-Brown
Physical Form	Liquid
Packaging	5 gal.
