

Technical Data Sheet

POLY FORCE CLAY BLOK

Product Description

POLY FORCE CLAY BLOK is an oil soluble extreme pressure drilling fluid anti-accretion product that is composed of specially formulated surfactants. POLY FORCE CLAY BLOK has an affinity for metal to reduce torque that is beneficial to increase ROP and prolong bit life.

Applications: POLY FORCE CLAY BLOK is best used in system concentrations in water base systems. The more solids that are in the mud will require higher concentration of **POLY FORCE CLAY BLOK**.

Treatments: typical treatments are 1 to 5% by volume of the circulating system.

KEY BENEFITS

- Increased ROP
- Reduced Bit Balling Effects
- Extending Bit Life
- Increased filter cake lubricity

Key Properties	
Color	Dark amber
pH	7.0
Solvent or Water Based	Solvent
Solvent Type	Oil
Physical Form	Liquid
Sg	0.906 (RT)
Max Temp	350°F
Packaging	Drums & Totes
