

Technical Data Sheet

CH Plus

Product Description

CH Plus is a combination of a proprietary blend of organic agricultural by-products blended and combined by proprietary formulation and Cellulose material used to prevent and/or regain lost circulation. CH Plus is an effective material for regaining circulation when major loss zones are anticipated. CH Plus should be used with various sizes of granular and flake material to produce a wide variation in particle size

Applications: CH Plus is compatible with all types of water, synthetic and oil based muds. It can be used in sweeps or pills or added to the entire system which will require pulling shaker screens.

Treatments: suggested treatments for minor losses are 2 - 10 lb/bb and 5 - 25 lb/bbl for losses requiring higher concentrations. CH Plus should be used with various sizes of granular and flake material to produce a wide variation in particle sized for better pore size coverage.

KEY BENEFITS

- Can be used in high fluid loss slurries or squeezes.
- Effective over a large range of concentrations.

Key Properties

Color	Brown Powder Dust
Physical Form	Fiber
Sg	0.24
Packaging	50/100 lb Sacks
