

Technical Data Sheet

CITRIC ACID

Product Description

Citric Acids, is used to reduce the pH of drilling fluids and for treatment of cement contamination. It also acts as a polymer stabilizer.

Applications: Decreasing pH due to cement contamination or other high pH drilling fluids products.

Treatments: All **CITRIC ACID** treatments vary due to levels of contamination.

KEY BENEFITS

- Preferred treatment of cement for polymer mud systems

Key Properties

pH	2.2
Color	Colorless
Physical Form	Crystals
Sg	1.66
Melting Point	153°C
Packaging	50 lb Sacks
