

Technical Data Sheet

Cotton Seed Hulls 60/40

Product Description

Cotton Seed Hulls is a Cellulose material used to prevent and/or regain lost circulation. Cotton Seed Hulls is an effective material for regaining circulation when major loss zones are anticipated. Cotton Seed Hulls should be used with various sizes of granular and flake material to produce a wide variation in particle size

Applications: Cotton Seed Hulls is compatible with all types of water, synthetic and oil based muds. It can be used in sweeps or pills or added to the entire system which will require pulling shaker screens.

Treatments: suggested treatments for minor losses are 2 - 10 lb/bb and 5 - 25 lb/bbl for losses requiring higher concentrations. Cotton Seed Hulls should be used with various sizes of granular and flake material to produce a wide variation in particle sized for better pore size coverage.

KEY BENEFITS

- Can be used in high fluid loss slurries or squeezes.
- Effective over a large range of concentrations.

Key Properties

Color	Brown Powder Dust
Physical Form	Fiber
Sg	0.24
Packaging	50/100 lb Sacks
