

Technical Data Sheet

DC 150

Product Description

DC 150 is a coarse grade attapulgite. **DC 150** has been designed to give high viscosity and high yield is fluids where the salinity exceeds 35,000 mg/L.

Applications: increase viscosity in salt water based muds.

Treatments: Typical treatments will be determined by desired properties. Pilot testing is suggested to determine the actual treatment required to obtain the desired properties

KEY BENEFITS

- **Increasing viscosity of salt water-based muds Providing suspension for solids.**

Key Properties

pH	8.5
Color	Light Cream
Physical Form	Powder
Sg	2.4
Packaging	50 lb Sacks
