

Technical Data Sheet

GYPSUM

Product Description

GYPSUM is a Simple additive to drilling fluids to help drill through gypsum/anhydrite and/or calcium-rich shale areas to combat formation sloughing

Applications: **GYPSUM** is a Economical treatment of carbonate-contaminated drilling fluids that does not buffer pH of drilling fluids. Its highly soluble source of calcium to "supersaturate" drilling fluids.

KEY BENEFITS

- Economical treatment of carbonate-contaminated drilling fluids.
- Does not buffer pH of drilling fluids.
- Highly soluble source of calcium.

Key Properties

Appearance	Powder
Color	White
Solubility	2.6 G/L
Sg	2.1
Packaging	50 lb sack
