

Technical Data Sheet

NEOFLO 4633

Product Description

NEOFLO 4633 is a premium-quality drilling fluid suitable for use in land based and deep water applications. Because of its clean natural gas origin, it contains virtually no aromatics and contaminants such as Sulphur and amines.

Applications: **NEOFLO 4633** is readily biodegrades, is non-toxic in the water column and has low sediment toxicity. It has a low viscosity, a low pour point and relatively high flash point making it ideal for deepwater exploration. It is widely used as a non-aqueous base fluid in an invert emulsion drilling mud in the upstream oil and gas industry.

KEY BENEFITS

- **Effective in both Land based and Deep water drilling applications.**
- **Readily biodegrades.**
- **Low Pour Point.**

Key Properties

Color	Light brown
Physical Form	Liquid
Flash Point	<-20 degrees C
Density	779 kg/m3
