

Technical Data Sheet

SAFEVERT Super Thin

Product Description

SAFEVERT Super Thin is a concentrated version of SAFEVERT TWA, a low toxicity thinner and wetting agent for all systems. When you need extreme thinning in a hurry, SAFEVERT Super Thin is the solution.

Applications:

This concentrated thinning agent is used to counteract the effects of high solids concentrations and water contamination in all invert systems. Promote oil-wetting of solids in oil-based muds. Increases the resistance of oil-based muds to water contamination. Reduces the inter-particle forces when formulating very high density oil-based fluids.

Treatments:

Treatments can range from 0.25 – 2.0 lb/bbl (0.71 – 5.71 kg/m³) directly to the system. It depends on the type of oil, properties desired as well as other components of the drilling fluids. Lab trials are recommended before field application.

KEY BENEFITS

- Coats the surfaces of shale and other solids.
- Provides extreme thinning in a hurry.
- Helps control water contamination.
- Highly concentrated so less usage.

Key Properties

Color	Dark green
Physical Form	Liquid
Sg	0.87- 0.90
Packaging	55 gl drum
