

Technical Data Sheet

SAFEVERT TWA

Product Description

SAFEVERT TWA is a concentrated, low toxicity thinner and wetting agent for all systems.

Applications:

This invert wetting agent and thinner is used to counteract the effects of high solids concentrations and water contamination in all invert systems. Can also be used to thin barite slugs before pumping.

Treatments:

For treatment of water or solids contamination: ½ - 1lb/bbl. To thin slugs: 2 -5 gallons per 50 barrels.

KEY BENEFITS

- Concentrated wetting agent.
- Aids in thinning elevated gels.
- Improves screen usage.
- Helps control water contamination.

Key Properties

Color	Dark Green
Physical Form	Liquid
Sg	0.87- 0.89
Packaging	55 gl drum
