

Technical Data Sheet

VALENCE TRX

Product Description

VALENCE TRX is a developmental drilling lubricant for use in Midland basin drilling applications. Designed for use in down hole drilling applications where problems associated with torque, drag, and sliding exist.

Applications:

Specifically designed for use in water-based mud systems VALENCE TRX is effective in a wide range of mud densities, and tolerant of very high temperatures. It is compatible with fresh water and brine-based drilling fluids .

Treatments:

Treatment levels range from 1.0 – 3.0% by volume in the mud system, while pills typically contain 1.0 – 5.0%, depending on the degree of problems encountered. As always, pilot testing is recommended prior to field applications

KEY BENEFITS

- **Designed for use in water based mud systems.**
- **Torque and drag reduction.**
- **ROP enhancement.**
- **Excellent thermal stability**

Key Properties	
pH	5.0 - 6.6
Color	Black
Physical Form	Liquid
Sg	.08
Packaging	Plastic tote
