

Technical Data Sheet

GP SEAL

Product Description

GP SEAL is a proprietary multi-blend product designed to plug loss circulation zones with ne to medium fractures. **GP SEAL** is easily mixed with conventional rig equipment and is designed to be used in water or oil-based drilling fluids. **GP SEAL** produces a thick, tough cake which resists washing away once drilling resumes.

GPSEAL will also function as a seepage and loss circulation material in water base muds.

Applications: **GP SEAL** is effective for use in water, oil and synthetic based systems. It can be used in sweeps or pills or added to the entire system.

Treatments: typical treatments are 2 to 10 lb/bbl for seepage and 10 to 35 lb/bbl for partial losses

KEY BENEFITS

- Provides a wide particle size distribution.
- Compatible with water, oil, and synthetic based systems.
- Easily mixed and dispersed into mud systems
- One sack product with no other additive requirements
- Fine grade easily passes through most shaker screens

Key Properties

Color	Brownish Red
Physical Form	Powder
Packaging	25 lb. Sack
